

Eolane Angers is hiring and will be present at the Careers fair

Eolane Angers, subsidiary of the Eolane group, a key player in professional industrial electronic services and connected solutions, is hiring around ten positions to strengthen its numbers and face up its development. To let it be known, the company will be exhibitor at the Careers fair, on the 30th of March at Le Parc des Expositions in Angers.

Cutting-edge markets

As electronics designer and manufacturer, Eolane Angers is active on numerous innovative markets such as aeronautics, automobile, defense but also railway transports. Within the scope of the transformation plan carried out in the group, titled CAP 2020, this subsidiary refocuses its know-how on the integration professions linked to the business segments it addresses. Thus, the company offers new careers opportunities in high technology or commerce job positions.

Eolane Angers, an ally for large-scale companies

Recognized for its expertise in the aeronautics and defense sectors, Eolane Angers works with Thales or Zodiac for instance. The company also has an extensive know-how in the automotive sector and is partner with key players on the market like Valéo.

Anchored in the historical electronics area in the region, Eolane Angers wishes, with its new organization, to reinforce its strategic position on its core markets by welcoming new talents.

Career opportunities

"We are currently looking for experimented profiles or not. We will be exhibitor at the Careers Fair on March 30th at the Parc des Expositions in Angers. This event will allow us to explain our profession, our organization and the procedure to follow for the candidates who wish to join us," Explains Nelly Lepage, HR Manager at Eolane Angers.

Eolane Angers is actively searching for candidates for its Supply Chain sector and its commercial department to strengthen its commercial development forces. The company offers real career opportunities and advancement to those who will share its values and wish to invest themselves in its development.
